

## WHEELED LOADING SHOVELS | MILITARY VARIANTS

Engine power: 36.4 - 216 kW (49 - 290 hp)    Operating weight: 4,934 - 23,800 kg    Standard shovel capacity: 0.8 - 4.0 m<sup>3</sup>

## MILITARY LOADERS.

- 1** JCB's first military machines were articulated steer loaders fitted with forks instead of shovels. In total nearly 1,000 JCB 410M models were supplied to the UK MoD beginning in 1984. 30 years on, articulated wheeled loaders like the 436M are still popular with military users.
- 2** Our wheeled loading shovels offer superb loader performance. Several configurations are available to improve reach, tearout or fork lifting.
- 3** These wheeled loaders offer a versatile and robust solution for military applications. In medium wheeled tractor trim, they've been used extensively by the UK Army to support beach landing operations.
- 4** A militarised JCB wheeled loading shovel can be waterproofed for a 1.5m wading depth. It can also be winterised for operating in temperatures as low as -40°C.
- 5** The optional chassis-mounted front winch is ideally suited to recovery operations, while a roof hatch improves access.
